Products detail

Product Name:	PVC PIPE Stabilizer KN-600	
CAS No:		
Product Type:	Catalysts & Chemical Agents -> Others	
Product spec:	KN-600, KN-500	
Packing:	20kg/bags standard packing	
Post Time:	2012-10-10	
Usage:	1.PVC Pipe Stabilizer KN-600 2. Lead based One Pack stabilizer 3.Appearance: Yellowish Bead 4. Particle Size(%): M=Less than 0.5% P=10 mesh 99%	
Description:	Kyungsan's stabilizer has superior lubricity for PVC pipe, it gives brightness and working appropriate flow in extrusion process. Initial color of KS-600 stabilizer shows good whiteness and also supports good weatheribility. When produced pipe exposure in rain or sunshine, then surface of pipe can be shown blurred dots and it is hard to erase. Kyungsan's stabilizer for pipe can prevent this happening on pipe surface. Lead based stabilizer KS-600 can be applied small diameter pipe to middle size. And bigger diameter requires more lead contents to satisfy more heat stability.
